HEAVY DUTY EXTERIOR ALUMINUM WINDOWS

Shown here with optional Adobe colored frame and Colonial Lites (Dividers are 3/8" wide)

Fusion welded frame & sash provides a solid barrier to air & water penetration- **Unique cove mold look & soft curve sash design offers an appealing traditional wood window exterior appearance-** Sloped sill provides maximum water runoff- weather stripping to fight air infiltration- **Heavy walled construction for maximum support, no adjustment needed-** NFRC Rated, Energy Star Approved and TDI compliant- **Sturdy Cam Lock and Keeper-** 3/4" Insulating Thermal glass system with advanced non-conductive edge spacer retards heat/cold transfer through the edge of the glass for additional energy savings- **Heavy duty metal spire balances for easy sash operation. No ropes or pulleys to wear or break-** Sash tilts inwards for easy cleaning from inside the home- **Aluminum glazing beads holds up against the sun's damaging UV rays, will not crack and warp like common plastic window glazing beads, eliminating the possibility of air and water leakage.**

Our top-of-the-line aluminum windows are made to order and built in custom sizes by Don Young. You will never need another window!

▲ Patented Allerguard weather-stripping with Mylar barrier on two sides of each sash gives double protection against wind, dust, airborne allergens and noise pollution.

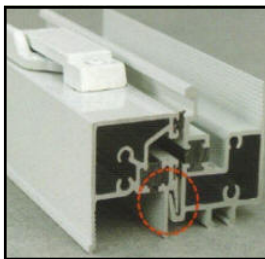

Our Heavy Duty Window comes standard with these features:

- *White Finish *2 3/4" Main Frame
- *1 1/2" Nail Flange for Flush-Mount application (top and bottom only)
- *Guardian "Climaguard" 55/27 Low-E Dual Pane Clear Glass *Half Screen
- *Limited Lifetime Warranty

Options include Argon Gas, Obscure Glass, Colonial Lites, Contour Grids, and Colored Frames
 Priced per United Inch
 Minimum Inset Size- 14" Wide x 24" Tall
 Maximum Inset Size- 52" Wide by 84" Tall.

All windows on this page are special orders and there are no returns.

Unlike the Standard Windows at the top of this page, custom sizes are available for our Heavy Duty Windows, with more options.

▲ Interlock system locks both sashes together to prevent high winds from separating sashes, provides tighter seal and added security.

For window replacement parts, see page 22.
 For caulking and sealants, see page 80.
 For screws and insert bits, see page 82.
 For window installations kits, see page 13.
