

Style Crest®, Inc. Fiberglass Steps

INSTALLATION GUIDELINES

- 1) Place your Style Crest® Fiberglass Step in front of the doorway that you wish to enter. The surface on which you place the step must be smooth, dry, solid, absolutely flat and level.
- 2) Place the step as close to the doorway as possible.
- 3) Size your step so there is no greater distance than seven inches from top of platform to threshold of the door.
(The true distance from the platform of the step to the threshold of the door should be no greater than the height of the shortest riser. In most cases it would be seven inches).
- 4) Bolt on either side rails, or a side and back rail.
(See rail installation instructions.)
- 5) Make sure the surface below the step is absolutely level.

WARNING: Failure to set and level the step properly may result in injury.

- 6) Keep your step clean, dry and free of ice. The steps may be cleaned with any household detergent. You may use salt to keep the step free of ice.

WARNING: Follow these guidelines. They are necessary to attain the maximum pleasure, performance and safety from your step.
